Under Minnesota law, Sellers of residential property, with limited exceptions listed on page nine (9), are obligated to disclose to prospective Buyers all material facts of which Seller is aware that could adversely and significantly affect an ordinary Buyer's use or enjoyment of the property or any intended use of the property of which Seller is aware. MN Statute 513.58 requires Seller to notify Buyer in writing as soon as reasonably possible, but in any event before closing, if Seller learns that Seller's disclosure was inaccurate. Seller has disclosure alternatives allowed by MN Statutes. See Seller's Disclosure Alternatives form for further information regarding disclosure alternatives. 13. INSTRUCTIONS TO BUYER: Buyers are encouraged to thoroughly inspect the property personally or have it inspected by a third party, and to inquire about any specific areas of concern. NOTE: If Seller answers NO to any of the questions listed below, it does not necessarily mean that it does not exist on the property. 243. **O. WATER INTRUSION AND MOLD GROWTH:** Recent studies have shown that various forms of water intrusion
244. affect many homes. Water intrusion may occur from exterior moisture entering the home and/or interior moisture
245. leaving the home.

246. Examples of exterior moisture sources may be

- 247. • improper flashing around windows and doors,
- 248. • improper grading,
- 249. • flooding,
- 250. • roof leaks.

251. Examples of interior moisture sources may be

- 252. • plumbing leaks,
- 253. • condensation (caused by indoor humidity that is too high or surfaces that are too cold),
- 254. • overflow from tubs, sinks or toilets,
- 255. • firewood stored indoors,
- 256. • humidifier use,
- 257. • inadequate venting of kitchen and bath humidity,
- 258. • improper venting of clothes dryer exhaust outdoors (including electrical dryers),
- 259. • line-drying laundry indoors,
- 260. • houseplants—watering them can generate large amounts of moisture.

261. In addition to the possible structural damage water intrusion may do to the property, water intrusion may also result
262. in the growth of mold, mildew and other fungi. Mold growth may also cause structural damage to the property.
263. Therefore, it is very important to detect and remediate water intrusion problems.

264. Fungi are present everywhere in our environment, both indoors and outdoors. Many molds are beneficial to
265. humans. However, molds have the ability to produce mycotoxins that may have a potential to cause serious health
266. problems, particularly in some immunocompromised individuals and people who have asthma or allergies to
267. mold.

268. To complicate matters, mold growth is often difficult to detect, as it frequently grows within the wall structure. If you
269. have a concern about water intrusion or the resulting mold/mildew/fungi growth, you may want to consider having the
270. property inspected for moisture problems before entering into a purchase agreement or as a condition of your
271. purchase agreement. Such an analysis is particularly advisable if you observe staining or musty odors on the
272. property.

273. For additional information about water intrusion, indoor air quality, moisture or mold issues, go to the Minnesota
274. Association of REALTORS® web site at www.mnrealtor.com.
